## OREGON JUVENILE DETENTION PREA SCREEN

---

### Purpose:

Questions are designed to obtain general information from youth on factors associated with being a potential victim or perpetrator of sexual abuse. Although not validated, objective questions, they provide information to raise staff awareness and guide decisions about room assignment, supervision, program participation, and intervention. How information is obtained or questions asked should be in accord with local facility policy. Questions should be integrated with the admission process and asked with sensitivity in keeping with best practice and training. Not all questions need to be addressed, but should be tailored to the policies and practices of each facility.

### Sources:

The questions were adapted from three sources – the Juvenile Detention PREA Survey (2014), the OYA PREA Report (Draft February 2013), and the MAYSI 2.

The *PREA Study in Oregon Juvenile Detention Facilities* (2014) based on the Juvenile Detention PREA Survey conducted with more than 200 youth in detention described the limitations of the study in providing a basis for a validated assessment.
